

Fire Safety

- ◆ If a fire occurs in the fryer & the ANSUL system doesn't discharge, pull the automatic ANSUL fire system handle, leave the area & **immediately** notify your manager
- ◆ If anything seems out of the ordinary, shut down & unplug the equipment & notify management
- ◆ Make sure exhaust hood filters are installed & cleaned properly
- ◆ Contact your manager at first sign of smoke or any other possible issue
- ◆ Inspect Ansul nozzle caps regularly & replace as needed
