

Comprehensive

# Camera Coverage Solutions

## Enjoy Best-In-Class Cloud-Based Video Storage

Watch, save and share court-admissible videos in high definition from your mobile device

- Upgrade from Analog to Digital High Definition Cameras for incredible picture quality that captures the smallest details
- Instantly back up video with cloud-based data & video storage and choose between different data storage duration levels
- Upgrade to 32 cameras for complete coverage of your location's interior and exterior, including the parking lot.

Surveillance Protection

## Audio & Video

Use surveillance to determine what transpired in any situation

- Take action to address concerns about workplace harassment
- Use case management tools to keep accurate records of any incident or claim

## Recommended Camera Placement

### Front Door

Identify guests entering and exiting the store as well as the restroom. Note that Exit ID cameras are preferred.

### Drink Station

Maximize coverage of beverage stations to protect against slip and falls.

### Entrance & Exits of Parking Lot

Consider parking lot entrances and exits, license plate numbers.

### All Areas of Parking Lot & Outside of Building

Full coverage of building exterior including parking lots and other surrounding areas.

### Front Counter POS

Capture open tills, the exchange of cash and product between the customer and cashier (transaction areas).

### Back Door

What and who is going in/out? Get a clear shot of the back door.

### PlayPlace Areas

Monitor all sections of restaurant to ensure cleanliness or potential injury claims.

### Freezer (Outside/Inside)

Grazing, product theft, #1 area for injury claims. Be aware of blind spots and foot traffic throughout the back area.

### Backrooms/Prep Areas

Inventory, food safety, employee productivity, injury, slip and falls, personal property, theft.

### Kitchen/Food Prep

Food & employee safety, presentation, accuracy.

### Office

Cash counts, employee productivity, manager meetings. Note that side angles are ideal; do not position cameras to face the backside of employees handling cash.

### Safe

Who is in your safe? View what is placed into and removed from the safe.

### Drive-Thru POS

Capture open tills, exchange of cash/products, the customer.

### Drive-Thru Lane

Capture activity outside the location. Consider dumpsters, menu boards and stacks.

### Outdoor Patio Areas

Monitor outdoor patios to ensure customer safety.

### Backlot

Capture video of everyone entering or exiting the premises. Video of dumpster area guards against slip and fall claims.
